

Employee Engagement with **Evabot**

Make the entire employee experience – from candidate to retirement – a memorable, exciting one that ensures you always onboard and retain the best talent.

Evabot is an AI-driven relationship assistant that enables organizations to put their employee gifting on autopilot, helping bring remote teams closer together, minimize attrition, attract the best candidates, and make everyone happier and more productive.

Thoughtfulness Matters

Your employee gifting experience makes your company extraordinary, and you can keep the best people by showing your workers you care at every opportunity:

Hiring

Attract the best talent for your organization and make them excited to join your team.

Onboarding New Hires

Connect and engage with your new employees, letting them know they've made the best choice.

Performance Engagement

Celebrate your hard-working team members' sales performance, milestone achievements, and more.

Life Events & Holidays

Let them know they're important by commemorating birthdays, promotions, holidays, births, adoptions, etc.

Use Cases

Employee gifting shouldn't be a "cost of doing business," but a chance to increase engagement and productivity.

Reviews & Surveys

Entice your team members to leave reviews of your company on employee review sites like Glassdoor.

Employee Rewards

Say thanks to employees of the month or top performers and send off retirees with a bang.

Relationship Building

Show your workers that their contributions matter to develop stronger, longer-lasting relationships.

Events & Prizes

Increase engagement with employees by holding events and contests where branded gifts are the prize.

I love the unique experience Eva provides our new hires. The chatbot is very modern with a fully packaged product and they take care of everything end-to-end."

Dion Hung-Lee,
Managing Director, SVB Financial Group

Why Use Evabot?

Bring Remote Teams Closer

Even though you have a distributed organization working remotely or traveling frequently, your workers don't need to be distant. Make them feel closer through engagement that measures happiness at every turn.

Minimize Attrition

By getting to know your employees in a tangible and measurable way to connect, share, and celebrate with them, you'll build stronger, long-lasting relationships and show your talented workers that they're in the right place with the right people.

Promote Positive Company Reviews

Impress your workers with personal touches that increase your eNPS and compel them to leave a positive review for your company on multiple channels – like Glassdoor – that shows future candidates how well you treat your teams.

Attract More Referral Candidates

After your employees receive their fun, memorable gifting experience, their social media posts and word-of-mouth recounting spread the word about how your organization treats their team members like family.

Get the Data You Really Need

Our AI relationship assistant measures your employees' happiness and collects valuable feedback from them at every turn, so that you receive full insight into what's working and won't waste time or money on future gifts that nobody wants.
